Jen Kelleman

Content Design Engineer & Agentic AI Strategist

Boston, MA · jennifer.kelleman@gmail.com · linkedin.com/in/jenniferkelleman · github.com/jkelleman · aiwithjen.com

SUMMARY

Content Design Engineer and Agentic AI Strategist with 15+ years turning complex machine learning and multi-agent capabilities into trustworthy, governable products. At Microsoft, I design the interaction models, content contracts, and recovery patterns behind enterprise AI in Fabric (~300K MAU) and Copilot (~487K MAU). I treat language as system infrastructure: prompts, error anatomy, status language, and semantic layers that are versioned, tested, and measured. I bridge design, engineering, data science, and product to take 0-to-1 AI work from ambiguity to production-ready specs, and I build working prototypes in Python and TypeScript to prove them.

CORE SKILLS

- **Content Design Engineering:** Prompt & context engineering, structured content contracts, error anatomy & status language, UX writing frameworks, information architecture, structured content modeling, CMS governance, localization & accessibility (WCAG 2.1)
- **Agentic AI Design & Strategy:** Agent orchestration & tool use, multi-turn conversational flows, human-in-the-loop review checkpoints, confidence & trust scoring, explainability & transparency patterns, 0-to-1 product definition, AI governance
- **Evaluation & Data:** Model evaluation & observability, telemetry planning, data & semantic layers, metric definition & standardization, reliability patterns, automated testing, bias & transparency guidelines
- **Technical:** Python, SQL, TypeScript, JavaScript, React, R, REST APIs, Model Context Protocol (MCP), Git/GitHub, CI/CD, VS Code, Figma, Microsoft Fabric, Microsoft Foundry, GitHub Copilot

EXPERIENCE

Microsoft — Principal Content Designer, Data Engineering & Agentic AI

Redmond, WA (Remote) · Mar 2026 – Present

- Lead end-to-end content strategy, information architecture, and naming across three Microsoft Fabric workloads: Lakehouse, Monitoring & Settings, and Agentic AI (~300K MAU).
- Architect agentic interaction patterns, guardrail checkpoints, and cross-surface handoffs for Project Osmos, the autonomous lakehouse agent, reducing manual pipeline authoring time by 78%.
- Build reusable, AI-native content systems integrated with custom agents, Model Context Protocol (MCP), and prompt evaluation frameworks for cross-team consistency.
- Partner with 25+ product, engineering, research, accessibility, and localization stakeholders to define roadmaps, feature taxonomy, and reusable patterns; mentor 30+ team members on AI content governance and prompt engineering.

Microsoft — Principal Content Designer, AI-Augmented Developer Tools & Copilot

Redmond, WA (Remote) · Jan 2026 – Mar 2026

- Set content strategy for Power BI Copilot (~487K MAU), defining voice, trust boundaries, and in-product guidance for an agentic experience.
- Designed interaction models, tool-use patterns, and status delegation for autonomous engineering agents, Copilot, MCP, and Work IQ workflows, improving developer task completion speed by up to 90%.
- Established verification and confidence display models for AI-generated guidance, structuring how agents communicate intent, status, and recovery to developers.

Microsoft — Principal Content Designer, Data Integration & AI Experiences

Redmond, WA (Remote) · Apr 2022 – Jan 2026

- Owned content strategy and UX writing across Fabric Data Factory and Azure Data Factory, supporting a workload that grew ~50% to ~209K MAU.
- Designed the Fabric Unified Error Framework across 5+ core workloads: standard error anatomy, status language, action labels, recovery actions, permissions context, telemetry, and escalation.
- Built the Semantic Metrics Modeling Assistant prototype (trust scoring, lineage visualization, governed conversational metric definition), reaching 50% adoption and cutting metric definition errors by 25%.
- Built the AI-Assisted Insights Agent prototype for explainable natural-language-to-SQL with human-in-the-loop review checkpoints, reducing query turnaround time by 55%.

- Established the organization's reference content system with terminology governance, contextual onboarding, and structured error recovery across 15+ product programs; earned 3 Executive Awards for Microsoft Global Hackathon projects.

CVS Health — UX Content Strategy Manager & Senior Content Designer

Woonsocket, RI (Remote) · 2019 – 2022

- Led UX content strategy across CVS Retail, OTC Health Solutions, and Aetna.
- Architected end-to-end content for the Buy Online Pick Up In-Store (BOPIS) fulfillment engine across app, mWeb, and desktop, scaling from 50 pilot stores to a nationwide $1B+ revenue stream.
- Designed Product Availability and Store Locator experiences generating 3M+ availability clicks, including real-time inventory status and error messaging.
- Built structured content models, CMS governance, and WCAG 2.1 standards into authoring workflows with product, engineering, legal, and analytics.

John Hancock — Lead Content Strategist & Content Manager, Wearables

Boston, MA · 2017 – 2019

- Built the U.S. content program from the ground up, managing a $250K+ budget and 10 writers across AEM and WordPress; achieved a 35% lead conversion rate and re-engaged 20K+ leads.
- Led journey mapping, information architecture, experimentation, personalization, chatbots, and voice interfaces; managed UX writers, UI designers, and front-end developers.

SundaySky — UX Writer & Content Strategist, Conversational AI

New York, NY · 2016 – 2017

- Designed voice-first chatbot dialog flows and dynamic video scripts for Fortune 500 clients (AT&T, American Express, Verizon), driving 35% lower churn and 40% fewer service calls.

Earlier Roles

- **Gwynnie Bee**, Lead UX Writer (2014 – 2016): UX copy for AI sizing recommendations; 200%+ mobile conversion growth, subscribers doubled to 150K+.
- **Victoria's Secret**, Copy Producer (2012 – 2014): e-commerce messaging for a 50M+ monthly-visitor site.
- **UX Writing Hub**, UX Writing Career Coach (2021 – 2022); **Kidsbooks LLC**, author of 25 internationally published children's books (2010 – 2012).

SELECTED PROJECTS & OPEN SOURCE

Independent agentic AI systems and prototyping · Boston, MA · 2022 – Present

- **prompt-ops-eval-harness** (live demo): Python/Pydantic v2 harness that validates agent-generated lakehouse plans, rejects hallucinated columns, gates destructive writes, and tests self-healing recovery, with CI and a Streamlit demo.
- **fabric-agent-canvas:** React/TypeScript components for human-in-the-loop agent interfaces: state indicators, guardrail approval cards, and recovery diff drawers.
- **AI Content Design Handbook & AI Content Orchestrator:** turned research into evaluation methods, bias guidance, transparency templates, and reusable content patterns.
- **VibeHub:** led design and UX engineering, scaling to 10K+ verified production projects backed by 22K+ tests and 80%+ coverage.
- **Human-governed AI operating system:** 20+ specialized agents across 320+ versioned files with explicit decision rights, durable context, and review checkpoints.
- **Domain prototypes:** AegisCSR (clinical safety reporting with de-identification and CDISC SDTM/ADaM ingestion), FieldOps AI (YOLO trap-counting with offline degree-day timing), and a multi-agent Wedding Planning Agent with inspectable recommendation scoring.

EDUCATION, CERTIFICATIONS & RECOGNITION

- **Carnegie Mellon University:** MS, Data Science (advanced coursework in CS & ML systems)
- **Emerson College:** MA, Writing & Publishing (Digital Innovation)
- **Lafayette College:** BA, Psychology and English
- **Certifications:** GitHub Foundations; Microsoft Azure AI Fundamentals; Microsoft Azure Data University (Cloud)
- **Microsoft Global Hackathon:** organizer, mentor, and judge since 2022; 3 Executive Awards, including 2024 Ability Hack (2nd Place Executive Challenge, AI + Sign Language) as lead storyteller and narrative strategist
- **FlareIQ:** winning-pitch recognition for a wearable prototype supporting people with Multiple Sclerosis
- **Community:** "GitHub for Beginners" workshop author and presenter for PyLadies Boston
